CHG: Planning Department

Town of Westerly and
The Community Development Consortium

Cordially invite you to a special presentation
of the Pierce Street Neighborhood Streetscape Project

By:

Richard Sheridan, Associate Professor,
University of Rhode Island and his
Senior Landscape Architecture Studio
At the Calabrese Club
May 3, 2006 at 7:00 P.M.

Enhancing the streetscape in the neighborhood is a component of the North End Revitalization Plan. The past three years have largely been devoted to the rehabilitation/new construction of some of the housing in the North End, and funds have been mainly directed to support that effort. In addition, the rehabilitation of the building at 70 Pierce Street for a community police station and for offices of the North End Crime Watch/Community Development, Inc. has encumbered resources. The Town wishes to broaden the scope of the revitalization effort and takes a first step with this URI project. Please come and see what the students of Landscape Architecture recommend for this important element of the neighborhood.

All are welcome
